Reyco Granning Fabricated Steel Spring Suspension

The model 74B suspension is designed especially for extreme duty operations. This suspension features extra wide 4 in. springs, hangers, and bushings which spread the load over a much larger area to improve durability and reliability. Rated at 30,000 lbs. (13.6 t) the Reyco Granning 74B suspension system is the standard by which all other extreme duty suspension are judged.

**Features**

- High tensile steel wear pads
- Precision fabricated hangers
- Adjustable torque arms for easy alignment
- Cast torque arms for maximum life span
- Large rubber bushings in all pivot joints
- Double clamp bolt-on torque arms for extra long life

**Benefits**

- GAWR (gross axle weight rating) of 30,000 lbs. (13.6t)
- Undermount weld-on hangers
- Mounting heights of 16.5 in. (417 mm) with a 5 in. (127 mm) round axle and 17 in. (432 mm) with a 5.75 in. 146 mm) round axle
  - 50 - 72 in. (1,270 - 1,829 mm) axle spread
  - 4 in. (102 mm) wide springs
