

Product Bulletin #: 10-0617
Model: 21B & 86/88
Topic: Polyurethane Bushings
Effective Date: November 13, 1998

Reyco Granning is providing optional polyurethane bushings and kits for uses where conventional rubber bushings may be too compliant (soft for the application). Also, polyurethane is not as affected by oils, ozone, and many elements that affect rubber products. You, the customer, must weigh the features to decide if these products will aid your operation.

The table below outlines the specific applications and part numbers.

MODEL	PART #	DESCRIPTION
21B	TK23586	Torque Arm Bushings
21B	TK23587	Torque Arm Bushings & Hardware
21B	1806701	Equalizer Bushing
86/88	21503-01	Equalizer Bushing

We are confident you will be pleased with these improvements. Please call your Reyco Granning Customer Account Representative for additional information.
