Superior Strength. Proven Performance.

Manufactured using industry-leading techniques, the Reyco Granning Global Axle has garnered a distinguished record of outstanding performance in markets around the world. Strong, lightweight, and incredibly durable, the Global Axle delivers superior value at a lower cost.

Features

Tubing
- One-piece tubing results in lighter weight with a stronger axle
- Induction heat treated spindle bearings and seal journals provide longer wear
- Journals finished on a full-length grinder guarantees neutral camber and toe
- Axle tube is drilled, tapped and plugged in preparation for the PSI tire inflation system

Camshafts
- A 1 5/8” journal at spider provides less torsion and less stroke
- Symmetrically-milled S-heads ensure equal engagement of both shoes with the drum and less stroke
- An induction hardened head, journal and spline produce less wear and a longer life

Brakes
- Extended life, 16.5” x 7” brake shoes standard
- Accurate positioning of cams and anchors result in less stroke
- Full ABS preparation in SAE position provide universal operation

- **E-coated shoes to resist rust-jacking**
- Linings formulated for North American market
