

## MODEL L225

The L225 auxiliary lift axle is a trailing arm style air ride suspension with straight or drop axles for use in tag or pusher positions. Available with self steering axles, designed to maximize payload capacity.

### Features

- Dual coil-over, self-centering stabilizers
- Serviceable dual draw key king pin housing
- Hub piloted, stud piloted (ball seat), and six spoke hub availability
- Positive dampening to prevent shimmying during highway-speed operation

### Specifications

- Total axle travel of 9"
- Adjustable frame width from 33.5" to 35"
- GAWR (gross axle weight rating) up to 22,500 lbs.
- Tag or Pusher axle position

## Options

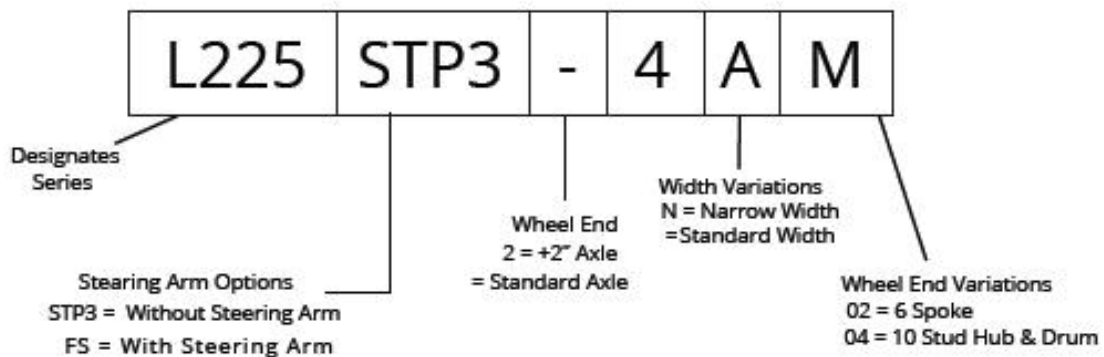

- Hub types: Stud piloted (ball seat), Hub piloted, Six spoke
- Air controls: power off down, in-cab or all-weather external manual control

## Applications

- Block Haulers
- Dump Trucks
- Refuse Vehicles
- Transit Mixers
- Straight Trucks
- Construction Vehicles
